

Duncan & Duncan Inc.

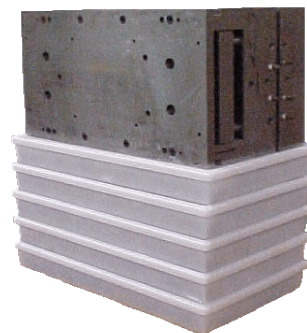

EVCO Core Box

Stores and organizes drill sample cores.
Dovetails with RightCoreWare™ hardware
and software for bar coding and tracking.

- 2½" HQ and 2" NQ
- Easy to use – no assembly
- Ideal for outdoor or underground use
- UV and weather resistant polypropylene

Reusable plastic. Reduces the total cost of ownership, when compared to legacy waxed cardboard boxes.

But EVCO Core Boxes are *much* tougher. As shown here, a stack of five holds up easily under a 960 pound weight.

Dovetails with EVCO Core Chocks.

RightCoreWare™ labels *really* stick to EVCO Core Boxes.

Easy to write on

or, even better ...

... use RightCoreWare™ to automatically print tough, plastic-laminated labels. The labels are readable by both people *and* computers.

High density 2D bar code captures and preserves drilling data, such as hole number and depth.

For details, see our RightCoreWare™ product guide.

How much are you or your clients paying to extract, catalog, and analyze each foot of core?
Isn't it worth a small percentage of this to *really preserve and protect* the integrity of that investment?
If this is an important professional priority, then EVCO Core Boxes are for *you*.
